#### **Climate**

Mediterranean rainfall  $\pm 650$ mm per annum. The vineyards are situated on north facing slopes at the upper end of the valley, hence the slightly warmer and more moderate climatic conditions, resulting in optimum grape berry ripeness. Situated in close proximity to the Atlantic Ocean, cool sea breezes help reduce the vineyard temperatures during the summer months, extending the ripening period and thus allowing for big well-structured wines to develop.

#### **Vineyards**

In-depth scientific research is embarked on before planting new vines – great care is taken to seek out optimum vineyard sites (aspect, soil types, altitude, etc.) that would be most suitable to a particular varietal genetic clone. The vineyards are carefully trellised and the canopy managed in such a way so as to ensure optimum phenolic ripeness of the grapes. Two 'green harvests' are done annually whereby the crop is reduced to between 6-8 tons per hectare to intensify flavours.

#### **Vinification**

The Shiraz was fermented in open top fermentation tanks and pumped over five times per day. Each Shiraz clone (6) sees a unique treatment of yeast and wood. Matured fifty percent in new French oak and fifty percent American oak (half new and half second fill), the wood maturation lasts 18 months. After blending the different Shiraz clones, the wine undergoes bottle-maturation for a further 18 months before being released.

#### **Tasting Notes**

**Colour** – Bright opaque. **Aroma** – Red fruit and toffee aromas are prominent, with hints of white pepper and spice. **Palate** – A big powerful, fruit driven wine, with smooth chocolate flavours. Great mid palate with seamless integration that leads up to a lengthy harmonious finish.
