Climate

Mediterranean rainfall \pm 650mm per annum. The vineyards are situated on north facing slopes at the upper end of the valley, hence the slightly warmer and more moderate climatic conditions, resulting in optimum grape berry ripeness. Situated in close proximity to the Atlantic Ocean, cool sea breezes help reduce the vineyard temperatures during the summer months, extending the ripening period and thus allowing for big well-structured wines to develop.

Vineyards

In-depth scientific research is embarked on before planting new vines – great care is taken to seek out optimum vineyard sites (aspect, soil types, altitude, etc.) that would be most suitable to a particular varietal genetic clone. The vineyards are carefully trellised, and the canopy managed in such a way so as to ensure optimum phenolic ripeness of the grapes. Two 'green harvests' are done annually whereby the crop is reduced to between 6-8 tons per hectare to intensify flavours.

Vinification

Fermented in open top fermentation vats, pressed, and left to mature in French 300L barrels for 18 months. The Cabernet clones (6) are kept separate throughout vinification, each getting a unique treatment of yeast and wood. After 18 months, the different clones are blended, bottled, and left to mature for at least 18 months before release.

Tasting Notes

Colour – Opaque. **Aroma** – Cherry and Chocolate aromas backed up by hints of spice from the French oak.

Palate – A very elegant wine with huge tannin structure, lovely fruit, and great mid palate weight. This spice-oriented Cabernet Sauvignon is supported by chocolate, tobacco and aniseed flavours on the palate.
